توصيف برنامج دراسي دكتوراه تمريض الاطفال
(للعام الأكاديمي 2025/2024) ساعات معتمدة

جامعة: بنها

كلية: التمريض

قسم: تمريض الاطفال

أ- معلومات أساسية:

١- اسم البرنامج: دكتوراه تمريض الاطفال

٢- طبيعة البرنامج: (أحادي) √ (ثنائي) (مشترك)

القسم العلمي المسئول عن البرنامج: قسم تمريض الاطفال

ب- معلومات متخصصة:

١- الأهداف العامة للبرنامج:

1-The program aims to :-

- 1.1- Equip local, national and international society with nursing competencies able to provide competent nursing care.
- 1.2- Construct developed curriculum and program for post graduate studies to keep pace with scientific development.
- 1.3- Appraise post graduate students ability to apply the basics and methodologies of scientific research and compliant with new trends in scientific research.
- 1.4- Equip the post graduate students with scientific and practical high level and enhance their ability for innovation.
- 1.5- Master the post graduate students with professional skills and appropriate utilizing of new technologies.
- 1.6- Provide a featured generation of researchers able to link scientific researches serve the issues and needs of the local community and contribute to solve community problems, developing and preserving the environment.
- 1.7- Master team work and develop team spirit and integration of different nursing specialties.

1.8- Provide post graduate students with continuous practical, scientific and behavioral self-development abilities.

1.9- Equip post graduate student with professional skills to deliver safe and compassionate evidence –based practice in the field of pediatric nursing.

1.10- Enable post graduate students to contribute to the planning and delivering of care by leading, delegating and supervising to adapt to change and initiate innovations in practice.

a.4- Explain the quality standards or guidelines of pediatric care.

a.5- Identify the basic steps of strategic planning.

a.6- Explain basic knowledge about child violence.

a.7- Discuss impact of domestic violence on the physical, psychological and social status of children.

a.8- Identify advanced concepts, measures and principles of pediatric critical care for the provision of high-quality nursing care.

a.9- Discuss research methodologies for the development of professional knowledge and skills.

a.10- Explain advanced models of evidence-based nursing practice regarding new trends in pediatric nursing.

a.11- Identify the basic principles guiding curriculum development in the field of pediatric nursing.

a.12- Explain the effect of professional practice in pediatric nursing on management of medical and surgical health problems.

a.13- Discuss ways of nursing information in health education.

b.1- Interpret research data and the research problem in the area of nursing.

b.2- Evaluate evidence-based practice instructional guide in nursing education research.

b.3- Use appropriate research and statistical methodology in education research in pediatric nursing.

-٢ المخرجات التعليمية المستهدفة من البرنامج :
١/٢ المعرفة والفهم :

- a.1- Identify issues and new trends that influence the pediatric nursing practice development.
- a.2- Explain the basic principles of leadership in coordinating, delegating and supervising care whilst remaining accountable for care given .
- a.3- Mention ethical and legal aspects in child psychology.
- a.4-Explain the quality standards in provision of pediatric care.
- a.5- Identify the basic steps of strategic planning
- a.6- Explain basic knowledge about domestic violence
- a.7-Discuss impact of domestic violence on the physical , psychological and social status of children.
- a.8-Identify advanced concepts, measures and principles of pediatric critical care for the provision of high-quality nursing care.
- a.9-Discuss research methodologies for the development of professional knowledge and skills.
- a.10- Explain advanced models of evidence-based nursing practice regarding new trends in pediatric nursing.
- a.11- Identify the basic principles guiding of curriculum development in the field of pediatric nursing.
- a.12- Explain the effect of professional practice in pediatric nursing on management of medical and surgical health problems.
- a.13-Discuss scopes of nursing informatics in health education.

٢/٢ المهارات الذهنية

- b.1- Interpret research topic and the research problem in the area of interest.
- b.2- Formulate evidence-based practice instructional guide in nursing education research.
- b.3- Discuss appropriate well-reasoned methodologies contributing to research process in pediatric nursing.

٢- الخريجون	استبيانات	لا يقل عن ٢٠ خريج
٣- أصحاب الأعمال/المستفيد من الخدمة	استبيانات	لا يقل عن ١٠%
٤- مقيم خارجي أو ممتحن خارجي	تقرير المراجع	
٥- طرق أخرى	نماذج الهيئة القومية لضمان جودة التعليم والاعتماد لتقييم المقرارات الدراسية
